DETAILED ACTION

Claims 1-7 are pending in the application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group 1. Claims 1-5 drawn to a polyetherpolyol for use in production of polyurethane, comprising carbons with stereoregularity of syndiotactic triad, classified in class 528, subclass 76+.

Group 2. Claims 6 and 7 drawn to a method of preparing polyetherpolyol, comprising polymerizing an epoxy compound in a presence of a double metal cyanide complex catalyst, classified in class 528, subclass 76+.

The inventions of Groups 1 and 2 are independent and patentably distinct because there is no patentable co-action among the two groups and a reference anticipating one member will not render the other obvious. Group 1 is drawn to a polyetherpolyol for use in production of polyurethane, comprising carbons with stereoregularity of syndiotactic triad while Group 2 is drawn to a method of preparing polyetherpolyol, comprising polymerizing an epoxy compound in a presence of a double metal cyanide complex catalyst. These are two different inventions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and as shown by their different classification, a search of the two groups designated above would impose an undue burden upon the examiner, and restriction for examination purposes as indicated is therefor proper.

Art Unit: 1621

A telephone call was made to John Egbert on 10/24/06 to request an oral election to the above restriction requirement, but did not result in an election being made.
